
Reduce MDB File Size

1. Stop Solserver/Slapd

```
sudo /opt/symas/etc/solserver stop
```

Or

```
sudo service solserver stop
```

Or

```
sudo systemctl stop solserver.service
```

2. Use MDB_Copy to make a non-sparse copy of the Database

```
mdb_copy /var/symas/openldap-data/<database>/ /tmp/backup/<database>/
```

3. Remove existing .mdb files from /var/symas/openldap-data/<database>

```
sudo rm -rf /var/symas/openldap-data/<database>/*.mdb
```

4. Replace with MDB_Copy created .mdb files

```
sudo cp /tmp/backup/<database>/*.mdb /var/symas/openldap-data/<database>/
```

5. Start Solserver/Slapd

```
sudo /opt/symas/etc/solserver start
```

Or

```
sudo service solserver start
```

Or

```
sudo systemctl start solserver.service
```
